

REMARKS/ARGUMENTS

The specification has been amended to update the status and more completely identify the cross referenced applications. No new matter is added by this amendment, as the previous identification uniquely identified the referenced application. This amendment is necessary to enable easy location of the referenced application.

The specification has also been amended to incorporate the priority claims provided at time of filing. At filing, the status of the application as a divisional application was identified in the application transmittal form (see the image file wrapper, papers filed 03-30-2000, item TRNA), and such an identification was proper under 37 CFR 1.78 at the time. The application is therefore entitled to the benefits of the prior filing under 35 USC 120. The specification has been updated to correctly reflect this priority claim, as well as the relationships to prior filed applications in the priority chain. No new matter is added by this amendment, as the previous identification uniquely identified the referenced application. This amendment is necessary to correctly identify the priority claim.

Entry of this amendment is proper as it addresses only formal matters in the specification. No claims have been amended, canceled, or added.

In view of the foregoing, Applicants submit that the application is in condition for allowance. If the Examiner believes that a discussion with Applicants' attorney would be helpful, the Examiner is invited to contact the undersigned or Ken Burraston at (801) 426-2100.

Respectfully submitted,

Date: October 26, 2009
